Subhanjan Shah

Computer Applications Student | Software Development, UI/UX & Technical Support

Hämeenlinna, Finland | shahsubhanjan@gmail.com
linkedin.com/in/subhanjan-shah | github.com/subhanjanshah

PROFILE

Computer Applications student and Student Assistant at HAMK, combining software project work, service design research, and customer service experience. Developing an AI-assisted newsletter prototype with Python and Streamlit. Interested in development, UI/UX, IT support, and customer-facing opportunities.

EXPERIENCE

Student Assistant — Häme University of Applied Sciences (HAMK)

September 2026 – Present | Part-time, Finland

Support Computer Applications and Business Information Technology students with technical issues and course concepts.

UI/UX & Service Design Research Intern — HAMK Design Factory

May – September 2026 | LMT Communications project, Finland

Completed a 405-hour placement exploring accessible, gamified language-learning progress in Moodle. Built digital prototypes, researched gamification, coordinated schedules and Miro boards, and prepared documentation and presentations. The three-person team delivered four design concepts, an interactive mockup, and a final client presentation.

Sales Associate & Cashier — Miss Art Garments Pvt Ltd

November 2023 – August 2025 | Kathmandu, Nepal

Handled customer enquiries, styling consultations, POS and digital payments, and cash reconciliation. Tracked more than 200 stock-keeping units in Excel and supported day-to-day operations in the family clothing business.

SELECTED PROJECTS

AI-assisted newsletter prototype — Suomen eOppimiskeskus ry | In progress

Primary coding responsibility in a Design Factory team. Python, Streamlit, and Qwen via Ollama support article collection from web searches and RSS feeds, summaries, Finnish translations, and styled bilingual newsletter export with human review.

LEGO EV3 line-follower robot — 2nd place, HAMK competition

Collaborated on a complete team implementation covering object-oriented programming, sensors, motor control, obstacle avoidance and line recovery, multithreading, thread communication, and JavaDoc documentation.

DataTrap innovation sprint — HAMKES × Business Riihimäki

Worked with a team to analyse nine years of wildlife collision data, propose ten warning-sign locations, and present the recommendations through a website and final review.

EDUCATION

Bachelor’s in Computer Applications — HAMK, Finland

August 2025 – December 2028 (expected) | Programming, data management, software development
